**C.A.S.H. WORKSHOP: Planning and Funding School Energy Projects
How Facilities Projects Can Reduce Operations Costs**

Registration: 8:30 a.m. - 9:00 a.m.

Program: 9:00 a.m. - 12:00 p.m.

This workshop will provide an overview of the options for energy efficiency and renewable energy projects that will provide schools with the most “bang for their buck” in terms of annual savings on their utility bill. As you may know, dollars saved through energy efficiency and renewable investments may be applied to other school general fund needs. Listen to others who have accomplished this and learn more from experts who can help your school – large or small – to measure current “baseline” load and achieve savings while sharing with your students the importance of lowering your carbon footprint.

Some of the areas that will be covered in the workshop:

- Conservation and Efficiencies
- Renewable Technologies
- Public Bidding for Energy Projects
- Funding Sources
- State Policy Trends:
 - Schools of the Future Initiative
 - Regulatory Items awaiting Public Utilities Commission action that may impact Schools
 - Governor’s Proposal/CEC
