

Proposition 39	Governor	AB 39	SB 39
Summary	\$450 million available to K-14 through the State Budget Process. \$400.5 million for K-12 and \$49.5 million to community colleges in first year on a per ADA/FTS Basis	Would continuously appropriate to the California Energy Commission (CEC) for this purpose each year in the amount that is transferred to the Job Creation Fund.	Would appropriate moneys to the Office of Public School Construction from the fund for the purposes of awarding energy efficiency grants for energy efficiency upgrades.
Efficiency vs. Generation	Efficiency first then potential for generation to be determined.	Both after certain level of efficiency.	Efficiency only.
Administering Agency	CDE would administer and may consult with the CEC and CPUC.	CEC would administer and ensure that the prescribed criteria are satisfied.	The Office of Public School Construction would handle accountability.
Funding Process	Per ADA – No application.	To be defined. Existing Programs. Grants, no-interest loans, or other financial assistance to an eligible institution.	Yet To Be Defined.
Job Creation	Yet To Be Defined.	This bill would require moneys for job training and workforce development to be available to the California Conservation Corps (CCC), Certified Community Conservation Corps, Youth Build, and other workforce development programs.	Energy Efficiency Project will enhance workforce development and employment opportunities, utilize members of the CCC or certified local conservation cops or accommodate learning opportunities for pupils or at-risk- youth in the community.
Equity Provisions	Yet To Be Defined.	Yet to be defined. The legislation would set forth certain criteria to be used to prioritize projects to be funded from moneys in the Job Creation Fund relative to public schools, school districts, public colleges and universities, and other public buildings and facilities.	Located at schools with an above average energy consumption. Economically disadvantaged criteria TBD and above average statewide unemployment rate.
Public Private Partnerships	None defined – per ADA	Public-private partnerships upon appropriation by the Legislature to establish and implement Property Assisted Clean Energy (PACE) programs or similar financial and technical assistance.	Joint partnership between two or more agencies including but not limited to other school districts, non profit corporations and local government agencies to maximize investment and public benefit.
