## Spring Statewide Advocacy Summit

March 13-14, 2019

1517 L Street | Sacramento

# School Energy Coalition Spring Statewide Advocacy Summit

Making K-14 schools more energy efficient and resilient should be a state priority. As funding for the voter-approved Proposition 39 program comes to a close, SEC is leading a new discussion on the importance of continued funding for cost-effective school energy and water projects. Our SEC Spring Statewide Advocacy Summit will focus on advocacy for a new funding program, as well as better electricity use tracking and control at the school site level.

Our SEC Summit will start with a half-day legislative briefing and how-to advocacy discussion session on March 13th, followed by a networking mixer. The next day we will hold our Summit General Session and hear from key State Agencies, Legislative and industry representatives on issues such as Zero Net Energy (ZNE), potential electricity and water language in the 2020 statewide school bond, electric vehicle and bus funding opportunities and resiliency through microgrids and energy storage. The California Energy Commission (CEC) has already committed to presenting at this event.

Attendees will also hear from new players, such as Community Choice Aggregation (CCA) providers in the electricity distribution system, and hear more about the future of fossil fuels and actions the state may be taking toward building de-carbonization through electrification and landscape design that considers water resources and greenhouse gas (GhG) reduction. The school districts “in the know” will be in the best position to take advantage of the coming changes and potential funding.

The Summit will conclude with a visit to the State Capitol to discuss energy and water issues with representatives of the State Legislature on energy issues and relay critical feedback on our request to continue funding under the Clean Energy Jobs Creation Fund. SEC Summit attendees will walk the halls and share the successes and accomplishments achieved on school sites throughout California and what a new school energy program might look like going forward.

Please register by February 20, 2019 if you would like SEC to secure a meeting with your Legislative Representative's office.

*The School Energy Coalition (SEC) is an advocacy organization focused on best practices for K-14 school projects to save energy and general fund dollars. SEC led the fight to ensure Proposition 39 funding was focused on K-14 school energy efficiency/renewable projects, and in 2017 successfully advocated for the continuation of the program, and continues to represent schools statewide in discussions on energy and water conservation, infrastructure, as well as Green Building Codes and Title 24.*

## Topics to Include:

- Proposition 39 Budget and Program Updates
- The Changing Electricity Framework
- Resiliency Through Microgrids and Energy Storage
- Legislative Actions and Advocacy for 2019
- Building Electrification / Carbon Neutrality
- Zero Net Energy
- District Case Studies in Energy

---

## Logistics:

*Mixer is included on March 13.*
